Supplier Portal

Central hub to:

- Engage suppliers
- Collect Due Diligence Statements & land plot geolocation data (GeoJSON)
- Streamline collaboration

Deforestation Risk Assessment

Advanced geospatial monitoring & remote sensing to:

- Verify land use
- Detect deforestation risks
- Trigger alerts to ensure EUDR compliance

Automated TRACES Reporting

Fully automated DDS management via direct API connection:

- Retrieve, create, withdraw & amend DDS seamlessly
- Ensure accuracy, speed & full automation

Supplier Risk Management

Proactive oversight to:

- Perform monthly or annual analysis
- Ensure compliance with human & social rights criteria
- Centralize tracking for accountability

Digital Traceability

Link EUDR attributes of raw materials to final products, ensuring:

- End-to-end chain-of-custody visibility
- Transparency
- Audit readiness

Testimonial

Finboot has proven that its solution provides efficient data orchestration, encompassing the integration of external data, enrichment with internal data, and linking to EU databases and geolocation applications. This significantly simplifies the process of meeting regulatory requirements, particularly in the context of the EU Deforestation Regulation.
